

TOBIE ANDERSON

OBJECTIVE Provide a personal commitment to public service for the City of Eastvale and serve as an elected official.

SKILLS & ABILITIES

- I have 19 years' experience in the utility industry, while performing at a high level in several job classifications.
 - I have a strong history of process improvement and market based management strategies.
 - I have designed and implemented large scale optimization initiatives within the SCE organization at high success rates.
 - I lead a safe and productive Troublemens workforce at SCE with an overall increase in safety performance and a significant decrease in operating expense.
 - During my tenure leading the Chamber of Commerce, I designed and executed a comprehensive strategic plan - increasing membership and revenues by 50%, exemplary customer satisfaction ratings, designed accounting infrastructure, restored critical business relationships, and created optimal marketing strategies.
 - I have extensive distribution/transmission field experience at several locations throughout the United States, including work experience at three major utilities.
-

EXPERIENCE

MANAGER, SCE/ GRID OPERATIONS RESOURCE PLANNING & PERFORMANCE MANAGEMENT

June 2015 – Present

- My current role in Grid Ops is leading strategic operational initiatives that require comprehensive analysis, core team interface and building, change management strategies, and process enhancement strategies.

PRESIDENT, EASTVALE CHAMBER OF COMMERCE

November 2014 – June 2015

- Served as executive leadership for the Board of Directors. Created a vision for the non-profit organization and develop a strategic plan for the Board to execute. Extensively work with City government on community development and economic success. Additionally, ensure the Board operates within state and federal regulation parameters.

FIELD SUPERVISOR, GRID OPERATIONS/VINCENT AND LUGO

April 2013 – June 2015

- Manage and supervise eleven direct reports for Grid Operations in Vincent and Lugo sectors and have maintained a safety conscious work environment. I have developed comprehensive strategies to reduce operational cost while increasing aggregate production. I have provided a strong emphasize in collaboration with multiple departments inside and outside the Edison organization. I have also designed a planning schedule for both sectors to operate under, which provides structure and accountability.

TROUBLEMAN, GRID OPERATIONS/DOMINGUEZ HILLS

October 2007 – April 2013

- Maintain a safe utility infrastructure for the public. I represented the Company in a professional manner while maintaining the distribution system, troubleshoot voltage issues, circuit and customer problems, facilitate crews accordingly for specific trouble occurrences, and retain an efficient and safe atmosphere for myself and peers.

JOURNEYMAN LINEMAN, DISTRIBUTION OPERATIONS LONG BEACH

October 2005 – October 2007

- Maintain, construct, and re-conductor distribution systems proficiently. Supervise line crews when needed and act as a valued mentor to subordinates and peers.

JOURNEYMAN LINEMAN/TROUBLEMEN, CONNECTICUT LIGHT AND POWER/LINE DEPARTMENT/STAMFORD, CT.

September 2002 – August 2005

- . Troubleshoot and maintain the distribution system in the state of Connecticut. I worked a revolving seven day duty shift that rotated every month.

LINE CREW FOREMAN, RED SIMPSON INC. /MIAMI, FL.

January 2001 – September 2002

- I ran an Electrical line crew of five to six men in the Southern region of the United States. The concept of the company was to allow each individual crew to operate as its own entity; all accounting, employee selection, and administration was directed by the foreman. The foreman was also responsible for the correct billing of services and employee payroll. This position gave me valuable insight of the utility business. Also, the business model effectively educated me in running an efficient well planned business strategy.

FOREMAN/LINEMAN/APPRENTICE, FLORIDA STATE SYSTEMS/FORT LAUDERDALE, FL.

January 1997 – January 2001

- Here is where I learned my craft and perfected it. We were challenged with large re-conductor and conversion jobs all over Southern Florida. I have trained several apprentices and even participated in educating apprentices at an accredited apprentice school.

EDUCATION

**Broward Community College – Davie, FL. – Business
1999**

**UNIVERSITY OF LA VERNE – ONTARIO, CA. – BA, BUSINESS
ADMINISTRATION**

2011

**ASSOCIATION OF BUILDERS AND CONTRACTORS INSTITUTE –
JOURNEYMAN LINEMAN CERTIFICATION – BOCA RATON, FL.**

2000

COMMUNICATION

- As a current manager at SCE, I am required to effectively present major initiatives to large audiences, including executive audiences.
- Furthermore, the management position requires efficient and effective meeting conducting skills to properly deliver the desired objectives.
- I have extensive experience in the public speaking arena with large and small audiences. I advanced my public speaking skills during my tenure at the Chamber of

Commerce. The executive position at the Chamber provided several public speaking opportunities.

LEADERSHIP

- During my career in the utility industry and my career in public service, I have lead high performing teams that have been a true honor to be associated with. My leadership strategies have been effective and consistent throughout my career: strategic planning, effective communication, accountability, planned execution, statistical analysis, quality decision making, and emphasis on collaboration.
